DETAILED ACTION

Allowable Subject Matter

1. Claims 1-35 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Prior art of record fails to teach or fairly suggest the claimed method and system of providing a usage pattern for a customer of a telecommunication system, the usage pattern providing historical information concerning the customer's user of the telecommunications system wherein each independent claim (i.e. claims 1, 14, 15, 29, 30, 34, 35 and shown in figure 8) require, inter alia, comparing usage pattern to historical information to be displayed as unused remaining minutes in the predetermined billing plan on a computer device allowing the customer to control the use of telecommunications based on the usage pattern thereby avoiding charges for overuse and allowing the customer to learn an identity of an unrecognized telephone number placing a call to the customer thereby preventing the customer from calling the service provider to learn the identity of the unrecognized telephone number which is a benefit to both the customer and service provider because the customers may themselves learn the identity of unrecognized telephone numbers, fewer customers call the service provider and, thus, the efforts of service representatives are better utilized.

Prior art of record, Ung et al (Pub. No.: 2003/0008635) teaches displaying remaining time at any convenient time (i.e. during call processing) but fails to allow customers to learn the identity of an unrecognized telephone number while viewing the

remaining time as required in each independent claim (i.e. claims 1, 14, 15, 29, 30, 34, 35 and shown in figure 8).

Prior art of record, Suryanarayana et al (6,487,401) teaches advice of charge using WEB page but fails to teach displaying unrecognized telephone numbers while viewing the advice of charges on a WEB page which is a requirement in each independent claim (i.e. claims 1, 14, 15, 29, 30, 34, 35 and shown in figure 8).

Prior art of record, Raith (6,493,547) teaches visually displaying remaining minutes in a prepaid calling block wherein the user controls the presentation of unused time but fails to allow the user to view the identity of an unrecognized telephone number while the remaining minutes are being displayed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
